

Rats & Mice Pellets

Description

A highly active anti-coagulant bait for the control of the norway rat, roof rat, the house mouse and gerbil.

This remedy may only be used in tamper-resistant bait stations

Child proof packaging

Selling points

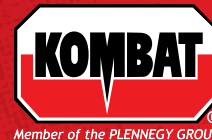

- + Highly effective against both rats and mice. Controls rodents that may be resistant to other anticoagulant rodenticides such as warfarin.
- + Rodents require only small amounts of bait for effective control.
- + Designed for reliable control in domestic, commercial, agricultural, and industrial environments.
- + Delayed action allows rodents to feed without immediately associating illness with the bait which encourages continued feeding within infestations.
- + Contains a bittering agent to discourage accidental consumption by children and non-target animals. Blue block formulation is less attractive to birds.
- + Lower risk of secondary poisoning to larger mammals when used correctly according to label directions.

Active Ingredient: Brodifacoum (anticoagulant) - 0.05g/kg (0.005%) Contains Bitrex | ⚠️ Read the label before use and keep out of reach of children & animals.
