

# RATS & MICE BLOCKS

Registration No. L6425 - ACT 36 OF 1947

Member of the PLENNEGY GROUP

Available in 75g

**KOMBAT RATS & MICE BLOCKS** is an anticoagulant bait (substance that thins the blood, thus not allowing it to clot) rodenticide which controls rodents.

### COMPOSITION

Active Ingredient  
Brodifacoum (Anticoagulant) - 0,05g/kg  
Bittering agent

### USES AND BENEFITS

**KOMBAT RATS & MICE** is effective in the control of rats and mice that are resistant to warfarin – an anticoagulant that has been used in many other rodenticides. **KOMBAT RATS & MICE** is a first generation active ingredient. Thus smaller doses of the product are needed than with other rodenticides ie. it is more effective at lower rates. It is safer for larger mammals e.g. dogs and cats, decreasing the chances of secondary poisoning. It contains a bittering agent, which acts as a deterrent for domestic animals and young children. The blocks are blue in colour and are therefore unattractive to birds. Each block has the words “RAT POISON” engraved on it. This acts as a warning to humans.

### METHOD OF APPLICATION

Place 5 – 7 blocks where there are signs of rodents such as behind fridges and stoves. Cover the bait in such a way that domestic animals and children cannot come into contact with it. Check the bait daily and replace when necessary. Rodents need only feed once on the product before the product is effective. In other words, the rodent dies after the first feed. Continue to place the bait until no signs of feeding are noted. If placing the product in the roof or ceiling, place the blocks above the ceiling. Repeat when necessary.

**KOMBAT RATS & MICE BLOCKS** is classified CAUTION with yellow band.

**HARMFUL**

WARNINGS	PRECAUTIONS
<ul style="list-style-type: none"> <li>Handle with care.</li> <li>Prevent access to baits by children and domestic animals.</li> <li>Store under lock and key away from food and feed stuffs.</li> <li>wPoisonous if swallowed and upon prolonged contact with skin.</li> <li>Toxic to fish and wildlife.</li> <li>In case of poisoning, call a doctor and make this label available to him.</li> </ul>	<ul style="list-style-type: none"> <li>Avoid contamination of any food, food utensils, feed and drinking water.</li> <li>Set bait stations where these will be inaccessible to children and domestic animals.</li> <li>Wash hands and exposed skin after handling.</li> <li>Destroy empty container and do not re-use it for any other purpose.</li> <li>Do not eat, drink or smoke while handling the product.</li> <li>Bury dead rodents and any bait unconsumed at end of treatment.</li> </ul>

**PLEASE READ THE LABEL BEFORE USE.**
