

RODENTICIDE

# RATS & MICE PELLETS

Registration No. L6424 - ACT 36 OF 1947

Member of the PLENNEGY GROUP

Available in 75g, 100g, 250g & 500g

**KOMBAT RATS & MICE PELLETS** is an anticoagulant (substance that thins the blood, thus not allowing it to clot) rodenticide which controls rodents.

## COMPOSITION

Active Ingredient

Brodifacoum (anticoagulant) - 0.05g/kg

Bittering agent

## USES AND BENEFITS

**KOMBAT RATS & MICE PELLETS** is effective in the control of rats and mice that are resistant to warfarin – an anticoagulant that has been used in many other rodenticides. **KOMBAT RATS & MICE PELLETS** is a first generation active ingredient. Thus smaller doses of the product are needed than with other rodenticides ie. it is more effective at lower rates. There is a limited risk of secondary poisoning. It contains a bittering agent, which acts as a deterrent for domestic animals and young children.

## METHOD OF APPLICATION

Place the pack where there are signs of rodents such as behind fridges and stoves. Cover the bait in such a way that domestic animals and children cannot come into contact with it or gain access to it. Check the bait daily and replace when necessary. Rodents need only feed once on the product before the product is effective. In other words, the rodent dies after the first feed. Death of the rodent will take 4 – 12 days. Continue to place the bait until no signs of feeding are noted. The bait is sealed in a plastic sachet. This sachet does not necessarily need to be perforated. If placing the product in the roof or ceiling, place the open pack above the ceiling. Repeat when necessary.

KOMBAT RATS & MICE PELLETS is classified CAUTION with yellow band.

**HARMFUL**

| WARNINGS  | PRECAUTIONS   |
|---|---|
| <ul style="list-style-type: none"><li>• Handle with care.</li><li>• Prevent access to baits by children and domestic animals.</li><li>• Store under lock and key away from food and feed stuffs.</li><li>• Poisonous if swallowed and upon prolonged contact with skin.</li><li>• Toxic to fish and wildlife.</li><li>• In case of poisoning, call a doctor and make this label available to him.</li></ul> | <ul style="list-style-type: none"><li>• Avoid contamination of any food, food utensils, feed and drinking water.</li><li>• Set bait stations where these will be inaccessible to children and domestic animals.</li><li>• Wash hands and exposed skin after handling.</li><li>• Destroy empty container and do not re-use it for any other purpose.</li><li>• Do not eat, drink or smoke while handling the product.</li><li>• Bury dead rodents and any bait unconsumed at end of treatment.</li></ul> |

**PLEASE READ THE LABEL BEFORE USE.**
