

INSECTICIDE

TAG ANT AND ROACH BAIT STATION

Registration No. L9780 ACT 36 OF 1947

Member of the PLENNEGY GROUP

Available in 2 pack & 4 pack

KOMBAT ANT AND ROACH BAIT STATION is a scientifically test gel bait matrix which has been placed inside a bait station and is effective in controlling common species of ants including Black, Common, Sugar and Garden ants as well as all common species of cockroaches including American, Oriental and German cockroaches and their nymphs.

COMPOSITION

Active Ingredient

Fipronil (phenyl pyrazole) - 0.6g/kg

DIRECTIONS FOR USE

TAG ANT AND ROACH BAIT STATION works by attracting the ants and roaches to the bait matrix in the bait station where they feed 24/7 and will continue killing them as long as the bait is available, attractive and not contaminated.

AREA OF PLACEMENT

TAG ANT AND ROACH BAIT STATION may be used both indoors and outdoors. Direct sunlight and water may reduce the residual effect. Placement of **TAG ANT AND ROACH BAIT STATION** should be out of sight usually in dark, damp and warm areas. These include, but are not limited to, in, under and behind kitchen appliances, preparation tables, sinks, basins, cupboards, shelving and electrical boxes. As certain ant and roach species are excellent climbers it may be advisable to position one or two bait stations in high-level cupboards and voids.

KOMBAT TAG ANT AND ROACH BAIT STATION is classified CAUTION with a blue band.

CAUTION

WARNINGS

- Keep out of reach of children, animals and uninformed persons.
- Keep away from food.
